HANDOVER NOTES

From: Samuel Ndegwa
Position: Full Stack Software Developer
Department: ICT
Date: December 10, 2025
To: ICT Manager, AA Kenya

---

1. PROJECT HANDOVER SUMMARY

No.	Project Name	Technology Stack	Status	Handed Over To	Handover Date	Remarks
1	Digital Mileage Calculator App - Frontend	Angular, TypeScript, HTML/CSS	Complete	Dan Wamuyu	10/12/2025	Fully functional and deployed
2	Digital Mileage Calculator App - Backend	Go, MySQL, REST API	Complete	Dan Wamuyu	10/12/2025	Fully functional and deployedd
3	Best Driver Challenge Contest App - Frontend	Angular, TypeScript, HTML/CSS	Complete	Dan Wamuyu	10/12/2025	All features implemented
4	Best Driver Challenge Contest App - Backend	Go, MySQL, REST API	Complete	Dan Wamuyu	10/12/2025	Fully functional and deployed
5	Valuation System - Backend	Go, GORM, PostgreSQL	Complete	Amos	10/12/2025	Fully functional and deployed
6	HCV & STL Inspection System - Backend	Go, GORM, PostgreSQL, Microservices	Complete	Amos	10/12/2025	Integration with frontend ongoing. May require time to time adjustment as needs arises.
7	AA Kenya Membership System - Backend	Go, GORM, PostgreSQL	Ongoing	Amos	10/12/2025	70% done

---

2. PROJECT DETAILS

2.1 Digital Mileage Calculator App

Frontend:

- **Repository Location:** https://github.com/Automobile-Association-of-Kenya/mileage-frontend.git
- **Deployment:** https://mileageapp.aakenya.co.ke
- **Key Features:** Mileage calculation and Report certificate generation

Backend:

- **Repository Location:** https://github.com/Automobile-Association-of-Kenya/mileage-backend.git
- **Server:** 64.20.41.158
- **Database:** MySQL - aakenya_mileage_app
- **Deployment:** https://api.mileage.aakenya.co.ke/mileage/api/v1

2.2 Best Driver Challenge Contest App

Frontend:

- **Repository Location:** https://github.com/Automobile-Association-of-Kenya/byd-frontend.git
- **Deployment:** https://bestdriver.aakenya.co.ke/#/login
- **Key Features:** Driver registration, Online Quiz Assessment, contest management, scoring system, leaderboard

Backend:

- **Repository Location:** https://github.com/Automobile-Association-of-Kenya/byd-backend.git
- **Server:** 64.20.41.158
- **Database:** MySQL - aakenya_byd
- **Key Features:** Contest CRUD operations, driver management, scoring algorithm

---

2.3 Valuation System

Backend:

- **Repository Location:** https://github.com/Automobile-Association-of-Kenya/aa-core-system.git
- **Server:** 64.20.41.158
- **Database:** PostgreSQL - aa_core_valuation
- **Key Features:**
    - Vehicle valuation calculation
    - PDF report generation
    - Historical valuation tracking
- **Dependencies:** GoPDF library for PDF generation, GORM ORM

2.4 HCV & STL Inspection System

Backend:

- **Repository Location:** https://github.com/Automobile-Association-of-Kenya/aa-core-system.git
- **Server:** 64.20.41.158
- **Database:** PostgreSQL - aa_core_valuation
- **Key Modules:**
    - Partner Management (Total Energies, etc.)

- Transporter Management
- Driver Management
- Inspector Management
- Inspection Workflow & Assessments
- Invoicing & Payment Processing (multi-request invoicing, partial payments)
- Dashboard with statistics and filtering

---

3. SUPPORT DURING TRANSITION

I will be available any time for:

- Clarifications on any project
- Emergency support on critical issues
- Additional knowledge transfer sessions if required

---

4. RECOMMENDATIONS

1. **Immediate Priority:** Complete the AA Kenya Membership System payment integration
2. **Code Review:** Conduct code review sessions for all systems
3. **Documentation:** Update any outdated API documentation
4. **Testing:** Perform end-to-end testing on all completed systems
5. **Backup:** Ensure all databases have recent backups
