Nyeri

Dear Sir/Madam,

RE: APPLICATION FOR IT OFFICER – SOFTWARE DEVELOPER

I wish to apply for the above-named position. I hold a Bachelor's Degree in Computer Science, with over 8 years of experience in Software Development and Information Management Systems Administration.

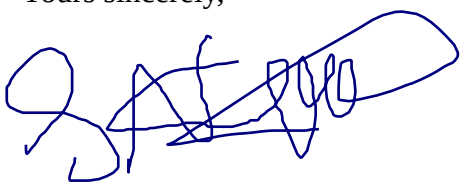
With my skill set and competencies, I am able to develop information systems, web applications, and mobile applications using current programming technologies such as Go or Java Spring Boot for RESTful APIs, Angular (Web Applications), Ionic/Flutter (Mobile Applications), and Electron (Desktop Applications), with databases such as MySQL, PostgreSQL, and MongoDB.

I am currently working as a Senior Full Stack Software Developer at AA Kenya, where I am developing the Core System for the company. We have adopted a microservices architecture due to the huge number of services offered by AA Kenya, hence the complex database structure. Prior to AA Kenya, I was working as an IT Officer at Consolata Hospital Mathari, where I served as Head of ICT for the hospital's sister medical college.

I started my career at Ekas Technologies Ltd., working as a software developer for the company. At the company, I was able to program Ekas Speed Governor's data transmission systems to meet NTSA standards. I also developed the Ekas Fleet Tracking App and Ekasline E-Commerce platform.

I have attached my CV highlighting some of my recent achievements. I would be most grateful if my application is considered favorably.

Yours sincerely,



Samuel Ndegwa Mwaniki
